Deinstall Oracle Enterprise Manager Cloud Control 13c

Olá, nesse artigo iremos abordar as etapas necessárias para remover uma instalação completa do OEM 13C.

Links úteis

- [Deinstalling Enterprise Manager (Single and Multi-OMS Environments)](#)

1 - Copie o arquivo de deinstall que se encontra no Home do OEM para outro diretório:

```
mkdir -p /tmp/deinstallOEM13c
```

```
cp -p /u01/software/em/middleware/sysman/install/EMDeinstall.pl
/tmp/deinstallOEM13c/EMDeinstall.pl
```

```
cd /tmp/deinstallOEM13c
```

2 - Execute o script deinstall:

```
/u01/software/em/middleware/perl/bin/perl
/tmp/deinstallOEM13c/EMDeinstall.pl -mwHome /u01/software/em/middleware -
stageLoc /tmp/deinstallOEM13c
```

- Nessa etapa será solicitado informar as seguintes credenciais:

```
Enter the SYS Password :
Enter the sysman Password :
Enter the Admin Server password :
```

3 - Ao final do processo serão exibidas as seguintes mensagens:

```
'detachHome' was successful.
Logs successfully copied to /u01/app/oraInventory/logs.
 return value is : 0
```

```
Deleting the instance home
Deleting the em home
The deinstallation of OMS is successful.

The location of the file is : /etc/oragchomelist
```

- Até a próxima.
